

ARE YOU FROM A DIVERSE ETHNIC BACKGROUND ?

Have you been invited for **CERICAL SCREENING?**

WE NEED YOU!

Only 2 in 3 women attend cervical screening.

In ethnically diverse communities, even fewer attend.

Not attending screening **INCREASES** the risk of cervical cancer.

We are keen to explore your thoughts about at home self-sampling options for cervical screening!

Could you spare 15 minutes to share your views?

Participants must be aged 16 or older

Raffle prizes available
