

# Greater Manchester Law Centre Steering Group

**T**he **right to justice** is as important as a right to health or education. For many, law centres provide the only means for **free, high-quality legal advice** and **representation**. Quite simply, no representation means no access to justice.

The **2.7 million people** of Greater Manchester are served by only **two Law Centres** and the city of Manchester has become a '**law centre free zone**'. The **Greater Manchester Law Centre Steering Group** is an exciting soon-to-be law centre offering **free legal advice and representation for the community and born in the community**.

**We need you to donate and get involved in the many fantastic projects and services lined up!**
