

The whole experience gave neighbours the opportunity to meet each other, demonstrate their many skills and most importantly to have fun.

During the tyre painting session it allowed the neighbours tap into their creative side. After explaining there was no 'right' or 'wrong' with how the tyres were painted, they just got on with it. This was enjoyed by all ages

LET'S KEEP GROWING!

The water container was put together by a few young people from the alleyway. This was truly a team effort.

Our banner making day was fantastic. One of the neighbours happened to be a machinist and lent a experienced hand.

One of the neighbours said "It was great the way that we had all come together"
