

Carers Federation Virtual Learning Environment (VLE)

Carers Federation are a City and Guilds Approved Training Centre and are investing in new technologies to improve and increase our training portfolio and make learning much more flexible and manageable for the learner.

We are excited to announce that our NEW Virtual Learning Environment (VLE) is due to go live in August 2018.

Our VLE is a unique and secure learning platform powered by Moodle. Its an interactive on line learning tool which allows us to deliver flexible learning options from full on line learning activities to a mix of on line and classroom based activities.

Benefits to Learners:

- You can access learning activities at a time and at a pace that suits your life-style
- We have a range of feedback and support interaction between learner and tutor all on line.
- You can access support forums and educational discussion groups

We are currently working on the following on line programmes which will be available for purchase in August 2018:

- **City and Guilds Level 2 in Independent Advocacy Unit 201**
 - **Introduction to Mentoring**
- **Carers Standard - Quality Standards in Carers Support**
